Subject: Summary for Mal (for Section 6. Evaluation and rationale)
MAL Section 6.4[1].docx

Dear all,

Now on IOPS (MAL Section 6-4.docx) and attached, many thanks to Ivan for drafting!

For background, this is consistent with Preamble guidance on page 21, line 17:
“Mechanistic and other evidence judged to be relevant to an evaluation of
carcinogenicity and of sufficient importance to affect the overall evaluation is
highlighted.”

Thanks again,
Kate
